PROFESSIONAL SUMMARY

Product-minded Full-Stack Developer with expertise in designing, building, and deploying scalable web, mobile, and desktop applications. Specializing in React, Next.js, TypeScript, and Node.js, with a strong focus on architecting custom SaaS solutions and robust RESTful APIs. Adept at leveraging AI-augmented development tools to accelerate coding workflows and optimize system performance. Proven experience in managing business operations, allowing me to bridge the gap between complex technical architecture and real-world administrative needs.

TECHNICAL SKILLS

- **Frontend Development:** React 18, Next.js, TypeScript, TailwindCSS, HTML/CSS.
- **Backend Development:** Spring Boot 3 (Java 21 Virtual Threads), Node.js (Express), RESTful APIs, WebSockets / STOMP, Prisma ORM, Flyway Migrations.
- **Databases & Caching:** MySQL 8, Redis, Relational Database Design, Query Optimization.
- **Mobile & Desktop:** Flutter, Dart, Java, JavaFX, Electron.
- **Tools & Methodologies:** Git, GitHub, Docker, k6 Load Testing, Agile/Scrum Workflow, AI-Augmented Development.
- **Languages:** Arabic (Native), Amazigh (Native), English (Professional), French (Intermediate).

EXPERIENCE

Systems Manager & Full-Stack Developer | Certified Translation Office —
Boumerdes, Algeria | 2024 - Present

- **System Architecture:** Currently designing and developing "Transly," a custom full-stack management program to automate digital archiving and streamline complex office workflows.

- **Web Development:** Designed, built, and launched a dedicated business website, significantly improving digital visibility and client interaction.
- **Operations Management:** Manage daily office operations, optimizing client communication and order tracking, which directly informs the UX/UI features of internal software tools.

Freelance Full-Stack Developer *Medev Codes | Boumerdes, Algeria | 2024 - Present*

- **Full-Stack Engineering:** Design and develop scalable full-stack applications across web, mobile, and desktop platforms for small businesses and independent clients.
- **API & Data Optimization:** Build robust RESTful APIs and optimize database performance using MySQL and Prisma for seamless data flow.
- **AI & Workflow Automation:** Apply AI-based automation tools to accelerate the development lifecycle and deliver high-quality projects efficiently.

SELECTED PROJECTS

- **Saarha (Direct Marketplace & Classifieds SaaS):** Algeria's premier fee-free classifieds & marketplace ecosystem ([Saarha](#)). Engineered with Spring Boot 3 (Java 21 Virtual Threads), React 18, Vite, TypeScript, Tailwind CSS, Flutter, MySQL 8, Redis, STOMP WebSockets, and k6 stress-tested to 1,500+ concurrent users. Features an event-sourced Reliability Score engine (0-100) and physically isolated security admin architecture.
- **[Transly](#) (Office Management SaaS):** A comprehensive multi-tenant solution built for translation agencies to handle secure document archiving, order processing, and desktop-web file synchronization.
- **SSM Delivery / RAQIB:** A dynamic logistics tracking and fleet management system featuring Flutter mobile apps, low-latency socket communication, real-time location tracking, and an intuitive UI.
- **E-commerce Platform:** Engineered a full-stack online store with secure authentication, dynamic product management, and checkout flows using Next.js, React, Prisma, and MySQL.
- **TIMZY:** A modular productivity and time management application tailored for students and freelancers.

EDUCATION

- **Higher Technical Diploma (BTS) in Software Development (Ongoing)**
- INSFP Bordj El Bahri | Expected Graduation: September 2026
- **Sciences & Technologies (Computer Science Track)**
- University of M'Hamed Bougara, Boumerdes, 2022 - 2024
